- Debugging
- 3D Objects & Web Visuals
- B2B
- Design Systems
- UX research
- Git & GitHub
- Adobe Photoshop
- JIRA
- UX Metrics & KPIs
- Usability Testing

👜 Professional Experience

UI/UX Designer & Frontend Developer, Freelance / Contract 03/2023 – Present | Atlanta, USA

- Design and develop responsive websites and digital products end-to-end, from UX research and wireframes to high-fidelity UI and frontend implementation with HTML, CSS, and JavaScript.
- Create scalable design systems, prototypes, and reusable UI components in Figma, ensuring consistency across desktop and mobile experiences.
- Conduct usability testing and iterate designs based on user feedback, product goals, and accessibility best practices.
- Create visual and 3D assets using Photoshop and Maya, while collaborating with clients, developers, and stakeholders throughout the product lifecycle.

UI Design Specialist, HAB BURO studio 04/2024 – 05/2025 | Cherkasy, Ukraine

Designed scalable web and mobile interfaces, visual hierarchies, and reusable UI systems. Created and maintained Figma design systems, supported developer handoff, and refined interfaces through usability testing, stakeholder feedback, and cross-functional collaboration.

UX/UI Designer, Smart Home App

Designed the UX/UI for a smart-home mobile product, including research, user flows, wireframes, high-fidelity prototypes, MVP interface design, and a reusable Figma design system. Iterated designs based on usability testing, analytics, and product requirements.

Founder & Operations Manager, FamCoffee 04/2021 – 03/2022 | Kiev, Ukraine

- Founded and managed a customer-focused business, overseeing operations, customer experience, and day-to-day processes to improve efficiency and service quality.
- Drove customer satisfaction and operational efficiency through process optimization and staff coordination, producing measurable improvements in service delivery.
